VERSION WITH MARKINGS TO SHOW CHANGES MADE

In the Specification:

The following has been added to the first sentence of the Specification:

--This is a continuation of Application Serial No. 09/219,925, filed on December 21, 1998. --

The paragraph beginning at page 5, line 3 has been amended as follows:

An electronic device having a display that is capable of concealing a keyboard is disclosed. In a "read mode" the display is visible to a user, but the display conceals the keyboard. This mode allows easy access to data and images via the display. When the display is moved to a "full [I/O (input/output) mode] input/output (I/O) mode", the display is still visible to a user, but the display no longer conceals the keyboard. This mode allows the user to input information via the keyboard as well as view information output from the display.

The paragraph beginning at page 5, line 10 has been amended as follows:

Figure 1 shows a prior art example of an electronic device 10 having a display 20 and maneuver buttons 22. A user is able to view information on the display 20, and the maneuver buttons 22 allow limited input for scrolling through data. The information displayed may comprise pictorial information (images) or textual information (names, appointments, [etc.]) etc.).

In The Claims:

Claims 1 - 29 have been cancelled.

Claims 30 – 54 are new.
